## USB-232

The USB-232 is an isolated USB to RS232 converter.

This product is ideal for computers which do not have a serial port, or where an extra serial port is required.

The USB-232 is unique in the market in that it has a world-unique device ID which ensures that it appears under the same COM port number regardless of which USB port on a particular PC it is plugged into. This simplifies application software configuration and eliminates many tech support issues.

Converts a USB port into an RS232 port

Powered entirely from USB port

Up to 230kbps RS232 data rate

Non-varying COM port number regardless of which USB port is used

Driver support for Windows 98, ME, Win2000, WinXP, Vista, Win7, Win8, Win10 (32 and 64 bit)

Apple Mac O/S supported (check before purchase)

Isolation 100% tested 1500V AC RMS

Female screwlocks on RS232 - like a standard PC RS232 port

All standard PC RS232 handshake lines supported for maximum compatibility

Low cost, quality product
